JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Acid activation
Electrochemical behavior of acid activated montmorillonite modified electrodes 169
Ac polarography
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone 235
ac Resistance
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements 29
Adsorption
Adsorption in semi-differential voltammetry 253
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93
Aminoacetate electrolyte
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte 247
Anodic electrocatalytic response
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds 153

Base catalyzed hydrolysis
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations 181
Bioelectrocatalysis
Bioelectrocatalysis by a selenoenzyme 259
Bi(V) sites
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds 153
Boron-doped films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films 139
Bromide
Electrocatalysis by vanadium haloperoxidase 161
2-Bromothiazole
Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile 147

Capacitance dispersion
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107
Carbonaceous materials
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus $Li|Li^+$ on the cyclic voltammograms of carbonaceous materials 223
Cations
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes 191
CdS nanoparticle
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold 229
Charge transfer
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state 49
Chloride
Electrocatalysis by vanadium haloperoxidase 161
Clay modified electrodes
Electrochemical behavior of acid activated montmorillonite modified electrodes 169
Clusters
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers 69
Comproportionation
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93
Conjugate base
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids 19
Constant phase element
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107
Convolution
Adsorption in semi-differential voltammetry 253
Cyclic polysilanes
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions 197
Cyclic siloxanes
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions 197
Cyclic voltammetry
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media 57
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent 11
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution 45
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations 181

Dawson structure
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure 39
Dc polarography
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone 235
Diamond electrodes
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films 139
Diffusion limited aggregation
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation 265

PII S0022-0728(98)00333-7

Digital simulation
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation 265
Dimethyl sulfoxide
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids 19
Dioxygen electroreduction
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen 209
Direct electrochemistry
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution 45
Dislocations
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers 69
Dissociative electron transfer
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids 19
Double layer
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107

Electroactive species
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media 75
Electrocatalysis
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes 127
Electrocatalyst
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling 83
Electrochemical immittance
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107
Electrochemical oxidation
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions 197
Electrochemical polymerization
Low potential electrochemical polymerization of benzene in a composite electrolyte of boron trifluoride diethyl etherate and trifluoroacetic acid 1
Electrochemical reduction
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93
Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile 147
Electrodeposition
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers 69
Electropolymerization
A new route to electroactive poly(2,2′-bithiophene-methylene)s from the anodic oxidation of triaryl ether units 5

Faradaic adsorption
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials 223
Fe–Mo alloy
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy 205
Ferrocene
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes 127

11-Ferrocenylundecanethiol
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold 229
Flatband potential
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes 191
Flat-band potential
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements 29
Fluoride electrolytes
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes 191
Fractal electrodes
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107
FTIR spectroscopy
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media 57

Glassy carbon electrode
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media 75
Glassy carbon electrodes
Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile 147
Glutathione peroxidase
Bioelectrocatalysis by a selenoenzyme 259
Gold modified electrodes
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state 49
Gold single crystals
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy 107
Graphite electrode
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent 11

Haloperoxidase
Electrocatalysis by vanadium haloperoxidase 161
Hanging mercury drop electrode
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93
Hemispherical nucleus
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation 265
Hexazinone
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone 235
Horseradish peroxidase
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode 121
Hydride
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling 83
Hydrogen evolution
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling 83
Hydrogen peroxide
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode 121

Impedance spectroscopy
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations 181
Indium oxide films
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations 181
Induced-codepositon
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy 205
In-situ FTIR
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent 11
In situ surface Raman
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy 205
Iodide
Electrocatalysis by vanadium haloperoxidase 161

Li-ion anode
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials 223

Mass transfer
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte 247
Mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media 57
Montmorillonite film
Electrochemical behavior of acid activated montmorillonite modified electrodes 169

N-Acetyl-microperoxidase-8
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution 45
Nanocrystalline materials
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling 83
4-Nitrophenyl
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media 75
Nitroprusside ion
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93
n-Type
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements 29
Nucleation
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation 265

Optically transparent thin layer electrode
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media 57
Organically modified silicate (ORMOSIL)
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes 127
Organic carbonate solution
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent 11

Passivation
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent 11
Passivity
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations 181
PbO_2-film electrodes
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds 153
Photoelectrochemistry
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold 229
Poly-cobalt tetra(*o*-aminophenyl)porphyrin
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen 209
Polycrystalline films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films 139
Polyether
A new route to electroactive poly(2,2′-bithiophene-methylene)s from the anodic oxidation of triaryl ether units 5
Poly(*o*-toluidine)
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state 49
Poly (*p*-phenylene)
Low potential electrochemical polymerization of benzene in a composite electrolyte of boron trifluoride diethyl etherate and trifluoroacetic acid 1
Positron lifetime spectroscopy
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers 69
Protein electrochemistry
Bioelectrocatalysis by a selenoenzyme 259
p-Type
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements 29

Rate-determining step
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids 19
Redox properties
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure 39
Regenerative processes
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution 93

Self-assembled monolayer
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode 121
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold 229
Semi-differentiation
Adsorption in semi-differential voltammetry 253
Semidonductor electrodes
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films 139
Semi-integration
Adsorption in semi-differential voltammetry 253

Single crystal films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films 139
Sodium chlorate
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling 83
Sol–gel
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes 125
Spectroelectrochemistry
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media 57
Surface treatment
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus $Li \mid Li^+$ on the cyclic voltammograms of carbonaceous materials 223

Thin layer
Adsorption in semi-differential voltammetry 253
Thiocynate
Electrocatalysis by vanadium haloperoxidase 161
Thionine
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode 121
Thiophenes
A new route to electroactive poly(2,2'-bithiophene-methylene)s from the anodic oxidation of triaryl ether units 5
Titanium and peroxotitanium
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure 39

UV-visible reflectance spectroscopy
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen 209

Vanadium
Electrocatalysis by vanadium haloperoxidase 161
Voltammetry
Adsorption in semi-differential voltammetry 253

XPS
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold 229

Zinc electrodeposition
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte 247
